Reference: Purchase Order #D-00617-332, GIT Project A-2869-000

Subject: Final Letter Report Covering the Period of February 18, 1981
to July 31, 1981

Dear Bob:

Enclosed you will find three attachments which represent the conclusion of the work performed on Project A-2869-000. These attachments contain FORTRAN programs and documentation intended to meet the requirements for (1) the China Lake Water System Control and Management, (2) the Camp Lejeune Raw Water Pumping Control, and (3) the China Lake Predictor/Corrector. Listings of the programs are provided. Magnetic tape copies of the programs will be sent on request.

It is our belief that these programs meet the requirements of the associated specifications. Where possible, the programs were tested for proper operation. However, since we do not have an in-house LX20 system, the testing process was rather limited.

It is anticipated that you may well need some further explanation of our results, or may require some implementation assistance. We will be happy to provide you with help in these matters. In addition, since we have now gotten over much of the LX20 understanding hurdle, we feel that we could provide some valuable assistance for other of your needs of this nature.

It has been a pleasure working with you on these matters to date. We look forward to working further with you in the future.

Sincerely, *A*

Mr. Bruce D. Barringer
